Insulation Liners for Supports

We offer full range of insulation for our piping supports. **Swathi Engineers** offers insulating liners to prevent thermal losses as well as to avoid damage to FRP/GRP/PVC/UPVC pipes.

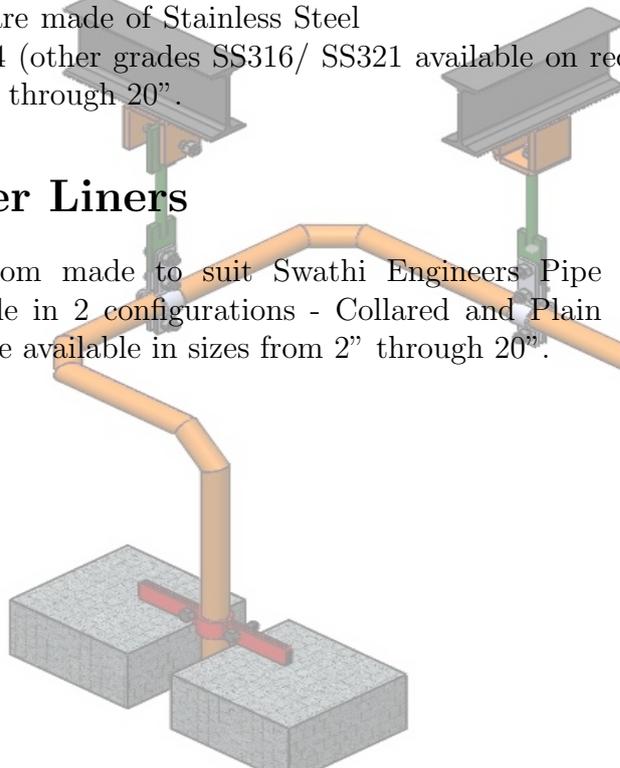

1 HDPE Liners

These are custom machined HDPE liners for clamping FRP/GRP/PVC/UPVC pipes. The primary function of this liner is to prevent damage to pipe from over-tightening. Collared construction prevents slipping of liners during axial movement of pipes. These are available in sizes from 2" through 20".

2 Stainless Steel Liners

These are Stainless Steel sheet liners for clamping of bare and hot stainless steel piping. These are made of Stainless Steel sheet Grade 304 (other grades SS316/ SS321 available on request). These are available in sizes from $\frac{1}{2}$ " through 20".

3 Rubber Liners

These are custom made to suit Swathi Engineers Pipe Clamps available in 2 configurations - Collared and Plain Sheet. These are available in sizes from 2" through 20".

4 Foam Jackets for Insulation of Chilled Lines

Rest assured for all your chilled or cold insulated pipe lines. Swathi Engineers also offers highly durable Poly-urethane foams in various thicknesses / densities/ length to prevent thermal losses at clamping points. These foam casings dovetail perfectly with all of our clamps and U-bolts. To ensure proper assembly, these foam pieces are enclosed inside a protective Galvanized Steel shell (SS/Aluminium options available on request).

5 Insulating Wooden Jackets

Swathi Engineers also offers Wooden Jackets in various thicknesses / length to prevent thermal losses at support points. These jackets are made of high quality timber to ensure long and trouble-free service. To ensure proper assembly, these jackets are enclosed inside a protective Galvanized Steel shell (SS/Aluminium options available on request).
